## OVERVIEW

Founded in 1989, McMurray Inc. is a full-service general contractor and custom builder for the high-end residential market. Our love of architecture, respect for the collaborative process and commitment to deliver great experiences has lead to many enduring relationships. We specialize in all aspects of renovation and new construction, supported by a dedicated team of subcontractors who are devoted to the same goal of complete customer satisfaction. We don't build for developers. We build for homeowners who desire a process that is personalized, honest and dependable. If you can dream it, we can help build it.

## CAPABILITIES

- Turn-key construction process and management—budget through build
- Collaboration with architect and owner to ensure open communication, clear expectations and the most refined product
- Thorough budget management process that delivers on time, on budget
- Long-term relationships for all subcontractor needs—from roofing to plumbing, tile to electrical, our extended team shares the same commitment
- Full-service design and fabrication cabinet and custom millwork woodworking shop in-house for kitchens, built-ins, baths and other needs
- A flexible, customizable process to meet homeowner's needs—we are not cookie-cutters, we are custom builders
- Focused on a few select projects a year to deliver personal dedication to each and every project
